

FEUDO
MONTONI

2020 Nero D'Avola Lagnusa Sicilia DOC

THE STORY

Lagnusa is the name of the cru from which the grapes hail. The name has its origins in the vineyard which has always been called “lagnusa” by the farmers of Montoni. In Sicilian, “lagnusa” means that which is lazy and produces small quantities. Today, we know that a vineyard that produces less, creates higher quality.

VINEYARDS

Area of Production: Cammarata (Agrigento)

Altitude: 600 meters (1,969 feet) above sea level

Exposure: East-facing vineyard

Soil composition: Clay and sand

Age of the Vineyard: 35 year old vines, grafted from our old Vrucura Nero d'Avola “mother plants.” By grafting in this antique manner, we obtain grapes with a unique and exclusive “DNA” of Feudo Montoni, our copyright of Nature.

Vine density: 4.400 vines per hectare (1,781 vines per acre)

Training system: Vertical trellis

Pruning system: Guyot

HARVEST

Notes: Handpicked and placed in small cases

VINIFICATION

Fermentation: 100% in cement containers. Malolactic fermentation takes place completely in cement.

Aging: 20 months in cement, 3 months in barrels, 4 months in the bottle

Alcohol: 13.5%

THE WINE

Tasting Notes: Ruby red in color. The structure does conquer with strength, but rather with elegance. Complex aromas are laced with notes of cherries-in-spirit, red plum, blackberry and warm spices, which are in harmony with one another. The boldest aromas are of warm spices, such as allspice, cinnamon and clove. Notes of menthol amplify the freshness. It is soft, velvety, sapid and laced with the right amount of delicate tannin on the palate.

VINTAGE NOTES

The 2020 vintage was marked with a rainy winter, but with sparse snowfall. The spring was characterized by solid precipitation, above average compared with seasonal averages. The rain then became sparser during the summer months, leading up to the harvest, which commenced in mid-September, about one week earlier than the average harvests at Montoni, as the grapes reached an ideal ratio of sugar to acidity earlier than usual. During the winter and spring, the temperatures were moderate, however during the summer months, cool nights offset the hot summer days, allowing for an ample acidity to form in the grapes. The overall production was marked with a slightly lower yield than the 2019 vintage but was steady compared to our annual averages. The quality of the grapes was high, and the resulting wines have vertical aromatics and are refined on the palate.
